

Role: Mechanical Supervisor

Location: London

Duration: Permanent following 6 month probationary period or extension thereof

Salary: Competitive

Glan Agua is an award-winning and innovative contractor providing project solutions for the water and wastewater industry including design, construction, commissioning, operation and maintenance.

The company has continued its growth strategy within the UK Water Sector and now boasts projects and long-term framework agreements with key Water Companies including Yorkshire Water, Affinity Water and Thames Water. It is an exciting time to join Glan Agua as we continue our growth strategy within the UK as we continue to develop and deliver projects through our UK Frameworks.

We are currently looking for a Mechanical Supervisor in London (Crossness and Greenwich)

Main Duties and Responsibilities:

- Supervise, coordinate and manage the execution of all the Mechanical activities on site.
- Ensures that all mechanical works are carried out in accordance with the agreed method statements and in line with the specifications provided by the supplier.
- Ensure that all mechanical works are carried out in accordance with safety and environment regulations and project quality standards.
- Supervise the refurbishment and construction work on water treatment plants.
- Liaise with client, subcontractors, and partners.
- Risk assessments and method statements (RAMS).
- Management of specialist subcontractors.
- Ensuring the project runs on programme.
- Ensure works are carried out in the most efficient manner possible to achieve optimum commercial results for the contracts under their control.
- Ensure contract programme is managed and meet.
- Ensuring all work is completed to an acceptable quality standard and in compliance with specification.
- Ensure adequate resources are in place for contracts under their control.

Experience/Qualifications Needed:

- Have a minimum of 5 years' experience in a similar role
- Mechanical background - A relevant third level qualification would be an advantage but not essential
- Have strong leadership skills
- Have strong written and verbal communication skills
- Have excellent people management and client skills
- Have a strong knowledge of latest building regulation and certification standards
- Have a sound knowledge of current construction techniques
- Have strong attention to detail
- Have a proven track record of delivery within a construction management function
- Thorough knowledge of computer applications such as Windows, Word, Excel, PowerPoint, Microsoft Project etc.
- Have a clear understanding of current Health & Safety legislation
