

Role: Project Manager

Location: London and Yorkshire

Salary: Competitive

The Role:

We are seeking an experienced Project Manager to join our growing water and wastewater business in the UK. As a Project Manager you will be responsible for the successful delivery of the project or projects assigned to you from a budget, programme & safety perspective from concept through to handover.

Main Duties and Responsibilities:

- Maintaining profit margin against target cost.
- Agreeing levels of resource against the programme.
- Site Health & Safety including management of the Health & Safety files.
- Environmental management.
- Maintaining governance against company procedures.
- Agreeing the programme & schedule of works.
- Collaborating with all stakeholders engaged within the project.
- Ensuring production of all documentation required to manage the project in line with CDM requirements.
- Compilation of weekly / monthly reports as dictated by the project.
- Monitoring of design outputs against the design deliverable schedule including remedial cause of action as required.
- Collaboration and management of the client throughout the project cycle.
- Confirming that all regularity standards are adhered to.
- Technical governance and sign off is adhered to.
- Evaluating scope of work and highlighting business risk.
- Managing/eliminating business risk.
- Chair collaborative meetings.
- Management of budget.
- Liaison with site team.
- Manage team expectations and outputs.
- Manage client expectations.
- Any other duties that are commensurate with the position as may be assigned from time to time.

Requirements:

- 10 years demonstrated project management experience.
- Experience of managing multidiscipline teams.
- Experience of managing multiple small projects or single larger projects.
- Bachelor's degree in a MEICA, Civil or Environmental Engineering.
- Project Management Professional Certification (PMP, APM).
