

**Role:** Commissioning Engineer

**Location:** Ireland

**Salary:** Competitive

**The Role:**

We are seeking an experienced Commissioning Engineer to join our growing water and wastewater business

**Main Duties and Responsibilities:**

- Completion of preliminary documentation and equipment checks.
- Initial power-up of MCC's, rotation checks for motors and I/O point to point checks.
- Setting up of instrumentation and scaling of instruments back to main control system.
- Uploading of first draft of PLC/HMI code and de-bugging as necessary.
- Troubleshooting of equipment, instrumentation and processes.
- Working with Process Engineers on process optimisation and continuous improvement to the water/waste water treatment plant.
- Working with design teams in the application of process and control solutions.
- Liaising between site engineering and management staff.
- Adherence to all H&S legislation, documentation and procedures.
- Completion of commissioning documentation on-site and return to Head Office.
- Co-ordination of project close-out stages including handover to the end user or Operations Department.

**Requirements:**

- Applicable Electrical Qualification.
- Minimum of 5 years' experience, preferably in the Water & Wastewater sector.
- Good working and process knowledge of the water and waste water sector.
- Capability to make control programme PLC and HMI modifications desirable.
- Excellent interpersonal and communication skills
- Excellent planning, organisational, training, teamwork, problem resolution skills
- Excellent literacy, numeric and IT skills including proficiency in Microsoft Office packages
- Full, clean driving license
